2 PhD Student Positions – Plant Cell Biology and Biochemistry

Two funded PhD student positions are available in the Department of Plant Systems Biology of the Technische Universität München in Freising-Weihenstephan. Both projects will be concerned with specific aspects of plant hormonal signalling and signal transduction.

More information on the research of the department can be found at:

<http://www.wzw.tum.de/sysbiol/>

Besides standard equipment for plant molecular biology research, the newly equipped laboratory has state of the art fluorescence and laser scanning fluorescence microscopes and direct access to transcriptomics and proteomics facilities.

The positions should be filled by September 01, 2010.

Letters of motivation together with a CV, the names of two referees and copies of relevant diplomas etc. should be sent by email to:

claus.schwechheimer@wzw.tum.de

Suitable candidates will be invited for an interview.
