

## Postdoc in Molecular Plant Science

We are looking for a highly motivated Postdoctoral Fellow who has a strong interest in basic science and plant biology in particular. Research in our lab focusses on peptide signaling in plants, with an emphasis on the biochemistry and cell biology of peptide signal biogenesis, and the mechanisms underlying peptide signaling specificity.

We offer a fully funded position at University of Hohenheim, close to Stuttgart airport in the south of Germany. We provide a stimulating research environment in an international and multi-disciplinary lab. The grant-funded position is available immediately for up to four years.

Applications will be accepted until the position is filled and should include CV, research experience and contact details of two references.
