

- > **Scope:** Fulltime
- > **Remuneration:** A13 LBesGBW
- > **Start:** as soon as possible

Ulm University is one of the leading research universities in Germany with a focus on natural science, technology and medicine. Its central campus offers excellent opportunities for interdisciplinary collaborations. The university seeks to appoint a

Scientific curator (permanent position, A13, m/f/d)

We seek to increase the proportion of women in research and teaching and particularly encourage qualified female scientists to apply for this position.

Severely disabled applicants with equal aptitude will be given preferential consideration.

at the Botanical Garden of Ulm University as soon as possible. The post holder reports to the Head of the Botanical Garden. The Botanical Garden represents a core facility for research, teaching, and public outreach events. It is one of the five largest botanical gardens in Germany, with collections covering a diverse range of living plants in various biotopes, a pharmaceutical garden, greenhouses with tropical plants, and a herbarium with samples from mainly the Neotropics and Europe.

Your profile:

- > **Qualifications required:**
- > PhD in organismic biology with a focus on botany, ecology or biodiversity
- > Independent research profile with a corresponding publication record in the field of organismic biology, biodiversity research or ecology
- > Excellent knowledge of angiosperm systematics and taxonomy
- > Teaching experience, especially didactics of organismic biology
- > Working knowledge of the multiple tasks and working procedures in botanical gardens
- > Experience in dealing with scientific collections
- > Excellent verbal and written communication skills (in German and English), and teamwork skills
- > At least three years' experience in teaching and research
- > Fulfillment of the legal and personal requirements for appointment as a civil servant in the career of an Academic Councillor

Desired skills:

- > Experience in project organisation and supervision
- > Acquisition of third-party funding (e.g., research proposals)
- > Experience in databases as well as management and analysis of collection-based data
- > Analytical and management skills
- > Highly self-motivated with the ability to motivate others
- > Problem-solving skills and a structured, independent working approach

Your responsibilities:

- > Coordination and management of scientific activities in the Botanical Garden: responsible for implementing a collection focus, providing scientific advice to gardeners, visitors and users, contributing to the annual programme, preparing the annual report, and offering guided tours and presentations at internal and external events
- > Development of the collections based on research and teaching demands; supervision, documentation, and integration of all collections in public databases, including data management
- > Research in organismic biology, preferably in the field of botany, biodiversity research, or ecology, including coordination of, and participation in, interdisciplinary projects to promote the Botanical Garden as a scientific core facility at Ulm University
- > Teaching academic courses in the field of organismic biology, e.g., plant identification, plant morphology, ecology, biodiversity of plants and animals, and excursions
