

## Speakers and Presentations

### **Eduard Strasburger-Workshop of the German Society for Plant Sciences (DBG) August 30 – September 1, 2017**

Dr. Christian Parisod, University of Lausanne: “Conflicting interactions among transposable elements and the rise of reproductive isolation”

Dr. Stephan Greiner, Max Planck Institute of Molecular Plant Physiology:  
“Evening primroses (Oenothera) - Linking the ecology of photosynthesis with speciation genetics”

Prof. Dr. Elvira Hörandl, Göttingen University: “Reticulate evolution in plants in recent and ancient”

Prof. Dr. Christoph Oberprieler, Universität Regensburg: “Gordian networks - The dark arts of phylogenetics and species delimitation in polyploid complexes”

Prof. Dr. Sabine Zachgo, University of Osnabrück: “Nuclear power: ROXY interactions with TGA transcription factors”

Dr. Duarte Figueiredo, Uppsala Biocenter, SLU Uppsala campus: “Auxin levels determine seed development in Arabidopsis”

Dr. Mariana Mondragón-Palomino, Universität Regensburg: “Role of gene and genome duplication in Angiosperm evolution”

Dr. Michael Nodine, Gregor Mendel Institute: “MicroRNA functions in Arabidopsis embryos”

Dr. Jens Weyen, Breun Saatzzucht: “Two genomes in one cell – history and new applications in plant breeding”
